a skinny little girl. As the five victims each struggle to hide their unspeakable truths, their unravelling becomes inevitable. When they are about to give up on life, the girl-child follows a hidden passage into a basement where the four women are waiting for her. Will they self-destruct, or join forces in the quest to find what they had lost?

"Beautifully written with a rare vulnerability and honesty. Intriguing, with just enough clues to prepare the reader for a terrifying yet wonderful choice." Heather Snyman, Trauma Counsellor and EMDR Therapist

www.fiveseats.org Five Seats is a magical realism novel. The unique characteristics of five protagonists and their harsh realities are combined with magical manifestations of their internal lives. Parts of the novel lean towards the style of realistic fiction, whereas other parts are written in the style of personal reflection or memoir. The style

parallels the nature of the five main characters: Ancient Woman, Madonna and Little Girl are the more primal characters, whereas Working Girl and Virago are more reflective, but also more detached, observing themselves from a distance. The seeming disjointedness of the protagonists challenges the reader to explore why and how the characters develop, as they survive violent events and struggle with the fallout. They inevitably fall apart, realising that they will not survive if they cannot overcome, and come together. Elements of magic run throughout the book, and fuse in the end. The characters' transformations are

both real-world and symbolic, rendering their development relevant to anyone reading the book. Five Seats is a literary commentary on dogmatism, hypocrisy, privilege, and the devastating impact of various forms of violence. Finally, the story also conveys hope and the belief that every person's journey, no matter how easy or hard, has meaning, is worthwhile, and 'magically' happens exactly as it should.

describes the politics, technology, marketing strategies, and environmental issues that have impacted electric and hybrid cars' research and development. The important marketing shift from a "woman's car" to "going green" is discussed. Milestone projects and technologies such as early batteries, hydrogen and bio-mass fuel cells, the upsurge of hybrid vehicles, and the various regulations and market forces that have shaped the industry are also covered.

The Accidental Billionaires meets the music streaming business in Press Play, a behind-the-scenes exposé of how Swedish college dropout Daniel Ek and his financial partner Martin Lorentzon took on the giants of Silicon Valley and the music industry, betting everything on the power of an idea to build the world's largest online source of

song On a San Francisco summer's eve in 2011, after more than a year of delays, Daniel Ek--the whiz kid CEO of Spotify--celebrated the hard-earned US launch of his company. Only fifteen minutes away lay the modest brick house belonging to Steve Jobs, who had worked hard to stop this moment from ever happening. The tech war between the Apple iPhone and Android had raged, and Jobs saw downloaded music, kept within his software, as the key weapon in his holy war against Google. But Spotify had redrawn the battle lines. With humble origins as a Swedish start-up, Ek's platform had catapulted to the top

of the music streaming world, using the threat of piracy and illegal downloading to get the notoriously hard-lined music labels to sign with him. But if Ek thought that the fight was won that summer's night, he would soon learn otherwise. Investigative tech journalists Sven Carlsson and Jonas Leijonhufvud deliver an action-packed, revelatory true tale--based on hundreds of interviews and previously untapped sources--about the creation of company that has revolutionized how the world consumes sound.

"As I was seated in remembrance and contemplation one night, in front of me appeared a great stag, shining and shimmering in whiteness, and there was a concentration of brilliant white light above its head. The stag was some feet away and was moving toward me. As it got closer, I could see that the white light on its head was emanating from a flaming brand, a torch, lit, glowing with brilliant white star-like light. The flaming brand, 'qabas' in Quranic Arabic, was as if a projection from the top of its head. The stag

came straight toward me, approached me until it was so near I could have reached out and touched it, and then the flaming brand that was on its head, was suddenly but so naturally, held by it in its mouth. The stag bowed its head and placed this flaming brand, this qabas at my feet, and disappeared. As this happened the following verse flashed through my mind, and I knew I had been given permission to spread the teachings that are coming to me, and I was given the name under which to do so; It is 'Qabas', a flaming brand; a torch for warmth and a light for guidance. لَاقَفَ الرَّانِيسَ أَرَادَ

One hundred years ago electric cars were the most popular automobiles in the world. In the late nineteenth century and at the start of the twentieth century, they outsold every other type of car. And yet, within a couple of decades of the start of the twentieth century, the electric car had vanished. Thousands of battery-powered cars disappeared from the streets, replaced by the internal combustion engine, and their place in the history of the automobile was quietly erased. A century later, electric cars are making a comeback. Fears over pollution and global

warming have forced manufacturers to reconsider the electric concept. A History of Electric Cars presents for the first time the full story of electric cars and their hybrid cousins. It examines how and why electric cars failed the first time - and why today's car manufactureres must learn the lessons of the past if they are to avoid repeating previous mistakes all over again. The book examines in detail: Early vehicles such as the Lohner-Porsche petrol-electric hybrid of 1901; Key figures in the history of the electric car development such as Henry Ford; Sir Clive Sinclair's plans to build a number

of electric vehicles, designed to sit alongside the Sinclair C5; The return of the electric technology to vehicles as diverse as the NASA Lunar Rover, commuting vehicles and supercars; Future developments in electric cars. For the first time the full story of electric cars and their hybrids are examined. The hidden past of the electric automobile is uncovered and its future developments are discussed. Superbly illustrated with 300 colour photographs, many of which are rare and original sketch designs. Nigel Burton has written and lectured on cars and automotive history for
