Physical Science (4th ed.) is an exciting and engaging introduction to the world of physics and chemistry. Designed and written for 9th graders, it provides the necessary foundation of knowledge and theory for subsequent science courses, including Biology, Chemistry, and Physics. This textbook also shows that true science involves glorifying God and serving our fellow humans in some capacity. Through practical Bible integration, students learn that a Christian worldview permeates true science. The textbook does not assume any prior knowledge in physics or chemistry, other than normal life experiences.

It erects a scaffold of basic information regarding matter and measurement early in the text; then builds on that beginning the essential information in classical physics, work and energy, thermodynamics, electricity, magnetism, sound, light, and optics. After grasping these topics, students are equipped to study the structure of the atom, compounds and chemical reactions, and mixtures and solutions. - Publisher.

Beginning with an introduction to why we do science, the Physical Science Student Text, 5th ed., gradually builds the student's understanding of physics concepts in a logical sequence. Beginning with classical mechanics, the text progresses through work and energy, wave phenomena, electricity and magnetism, and light and optics. These transition naturally into the chemistry topics, beginning with the

Chemistry, 4th ed., gives students the tools to build an understanding of atomic structure, chemical composition, and chemical reactions. Throughout the course, students will put these tools to work in different fields of chemistry in ways that can show them the impact that chemistry can have to help people and to wisely use God's world to glorify Him. This new edition features new content about semiconductors and nuclear chemistry as well as additional biblical worldview-shaping sections that help students to think through common debates among scientists. - Publisher.
