This book is the thirteenth in a series presenting research papers arising from MSc/MRes research projects undertaken by students of the School of Computing and Mathematics at Plymouth University. The publications in this volume are based upon research projects that were undertaken during the 2014/15 academic year. A total of 17 papers are presented, covering many aspects of modern networking and communication technology, including security, mobility, coding schemes and quality measurement. The expanded topic coverage compared to earlier volumes in this series reflects the broadening of our range of MSc programmes. Specifically contributing programmes are: Communications Engineering and Signal Processing, Computer and Information Security, Electrical and Electronic Engineering, Network Systems Engineering, and Robotics.

This book looks at the link between voters and political party systems in Asian democracies, focusing on India, Indonesia, Korea and the Philippines. It discusses this link in terms of three distinct elements: the formation of voters preferences, the translation of preferences into votes, and the translation of votes into seats. The book goes on to discuss how far the general rules of political party systems and their underlying causal mechanisms such as strategic voting are apparent in these Asian democracies. In particular, it explores the extent to which electoral rules and social structural variables affect the process of transforming preferences into a political party system within the context of Asian politics.The extensive areas covered by the book overcome the traditional sub-regional division of Asia, namely, East, Southeast and South Asia.

The Canon Camera Hackers Manual addresses "geeky" owners of Canon consumer cameras, such as the Powershot and IXUS, who would like to explore the possibilities of their cameras and tweak them to do things that go well beyond the camera's original specifications. --

Examines chivalry in the context of the Middle Ages

This book came from experiences I have gone through in my Christian walk. I became a Christian in 1993 and soon enough I came to know that if I were to enjoy my Christian life, I had to renew my mind with the Word of God. I also came to realize that, the environment that I grew up in and the developed mind set over the years, were directing how I related to God and His Word. To a larger extent, this was always in conflict with the Word of God. I would get frustrated when my prayers were not answered how and when I wanted them to. I would begin to ask myself questions such as; "Is God punishing me for something? Did God really hear my prayers? How did so and so receive what I have been asking for months?" But as I continued to study and mature in the Word of God, things became clearer. Sometimes a believer will struggle with questions, but fear to ask them, fearing being judged or presuming they are of little or no faith. Throughout my ministry, I have dedicated myself to encouraging people to overcome their fears in order to reach their God given potential. I believe that all of us are capable of living a full life, but misinterpretation of what is a full life creates frustration. This book is a compass to the person who is trying to figure out where their Christian life is and where it is heading. I present truths in this book in a simple and understandable language without diluting the intended message. I am currently the founding Pastor at God Our Rock International Church in Toronto, Ontario, Canada.

Getting your Canon Speedlite to produce the light you need can be a real challenge. For those new to flash photography—or for anyone who has previously given up out of frustration—Speedlitter ' s Handbook is a revelation. Photographer Syl Arena takes you on a journey that begins with an exploration of light and color, moves through a comprehensive discussion of the Canon Speedlite family and all of the accessories and equipment available to the Speedlitter, then settles down to crafting great light in one photo shoot after another. Whether you want to create a classical portrait, shoot an event, or simply add a little fill light to a product shot, Speedlitter ' s Handbook shows you how. A fantastic in-depth resource illustrated with over 500 images, Speedlitter ' s Handbook covers: how to see the various characteristics and properties of light itself, as well as the differences between how your camera sees versus how you see all the buttons and dials of the entire Canon Speedlite family the basics of on-camera flash...and the necessity of getting your flash off the camera how to beautifully balance flash with the existing ambient light all the equipment necessary for great Speedlite shots how to get amazing shots with just one Speedlite how and when to use E-TTL versus manual flash the use of color gels to balance color, as well as create dramatic effects how to tame the sun—or any really bright light—with hi-speed sync and much, much more Whether you ' re shooting portraits, events, or sports, Speedlitter ' s Handbook is an essential resource that teaches you how to craft the light you need for any type of shot you want.
