Most of us are really, really good at devising reasons to indulge in foods that derail our diets and healthy eating plans. Who among us hasn't thought, "I had a stressful day, so I deserve this chocolate," or, "Buttery popcorn would go so well with this movie!" When we view food as a reward, emotional eating can be difficult to overcome. Most fad diets tell you to "control" your eating, use willpower, ignore your cravings, or just stop eating. Recall for a moment where this got you in the past. Feeling frustrated or hopeless? Maybe it led you to make more excuses? Perhaps you're thinking I need to get control. This is a sign that the diet mentality may be deeply ingrained in you. Rest assured that there are alternatives to fad dieting and trying to "control" your body. In *But I Deserve This Chocolate!*, psychologist Susan Albers takes aim at the fifty most common self-sabotaging thoughts and excuses that keep you from eating right and looking great. This guide dismantles each excuse and offers a mindfulness exercise to help reroute your thoughts so you can meet your health goals. Whether you're a man or woman, teen or adult, this book is for you if you are trying to eat more mindfully, manage your weight, lose weight, or take charge of your eating habits. Forget the chocolate and unwrap some truly nourishing habits you can feel good about—your body will thank you!

Since Dr. Brizendine wrote *The Female Brain* ten years ago, the response has been overwhelming. This New York Times bestseller has been translated into more than thirty languages, has sold nearly a million copies between editions, and has most recently inspired a romantic comedy starring Whitney Cummings and Sofia Vergara. And its profound scientific understanding of the nature and experience of the female brain continues to guide women as they pass through life stages, to help men better understand the girls and women in their lives, and to illuminate the delicate emotional machinery of a love relationship. Why are women more verbal than men? Why do women remember details of fights that men can't remember at all? Why do women tend to form deeper bonds with their female friends than men do with their male counterparts? These and other questions have stumped both sexes throughout the ages. Now, pioneering neuropsychiatrist Louann Brizendine, M.D., brings together the latest findings to show how the unique structure of the female brain determines how women think, what they value, how they communicate, and who they love. While doing research as a medical student at Yale and then as a resident and faculty member at Harvard, Louann Brizendine discovered that almost all of the clinical data in existence on neurology, psychology, and neurobiology focused exclusively on males. In response to the overwhelming need for information on the female mind, Brizendine established the first clinic in the country to study and treat women's brain function. In *The Female Brain*, Dr. Brizendine distills all her findings and the latest information from the scientific community in a highly accessible book that educates women about their unique brain/body/behavior. The result: women will come away from this book

knowing that they have a lean, mean, communicating machine. Men will develop a serious case of brain envy.
