HUGO AWARD FINALIST • “WOW! What a splendid (scary) notion: a human upgrade! What a superb plot! Darwin's Radio is bloody damned good.”—Anne McCaffrey “Virus hunter” Christopher Dicken is a man on a mission, following a trail of rumors, government cover-ups, and dead bodies around the globe in search of a mysterious disease that strikes only pregnant women and invariably results in miscarriage. But when Dicken finds what he’s looking for, the answer proves to be stranger—and far deadlier—than he ever could have imagined. Something that has slept in human DNA for millions of years is waking up. Molecular biologist Kaye Lang has spent her career tracing ancient retroviruses in the human genome. She believes these microscopic fossils can come to life again. But when Dicken’s discovery becomes public, Lang’s theory suddenly turns to chilling fact. As the outbreak of this terrifying disease threatens to become a deadly epidemic, Dicken and Lang must race against time to assemble the pieces of a puzzle only they are equipped to solve—an evolutionary puzzle that will determine the future of the human race . . . if a future exists at all. Praise for Darwin’s Radio “Bear is one of our very best, and most innovative, speculative writers.”—New York Daily News “Superb . . . Bear's novel is frighteningly believable with a lot of clearly explained hard science, but the personal struggles of the well-realized characters keep everything on a human level.”—Focus “Bear is a writer of passionate vision.”—Locus “Darwin’s Radio scores a high rating on the thrill monitor.”—Birmingham Post (England) “Absorbing and ingenious.”—Kirkus Reviews

## Acces PDF Darwins Radio 1 Greg Bear

Greg Bear's Nebula Award-winning novel, *Darwin's Radio*, painted a chilling portrait of humankind on the threshold of a radical leap in evolution—one that would alter our species forever. Now Bear continues his provocative tale of the human race confronted by an uncertain future, where “survival of the fittest” takes on astonishing and controversial new dimensions. Eleven years have passed since SHEVA, an ancient retrovirus, was discovered in human DNA—a retrovirus that caused mutations in the human genome and heralded the arrival of a new wave of genetically enhanced humans. Now these changed children have reached adolescence . . . and face a world that is outraged about their very existence. For these special youths, possessed of remarkable, advanced traits that mark a major turning point in human development, are also ticking time bombs harboring hosts of viruses that could exterminate the “old” human race. Fear and hatred of the virus children have made them a persecuted underclass, quarantined by the government in special “schools,” targeted by federally sanctioned bounty hunters, and demonized by hysterical segments of the population. But pockets of resistance have sprung up among those opposed to treating the children like dangerous diseases—and who fear the worst if the government's draconian measures are carried to their extreme. Scientists Kaye Lang and Mitch Rafelson are part of this small but determined minority. Once at the forefront of the discovery and study of the SHEVA outbreak, they now live as virtual exiles in the Virginia suburbs with their daughter, Stella—a bright, inquisitive virus child who is quickly maturing, straining to break free of the protective world her parents have built around her, and eager to seek out others of her kind. But for all their precautions, Kaye, Mitch, and Stella have not slipped below the government's radar. The agencies fanatically devoted to segregating and controlling the new-breed children monitor their every move—watching and waiting for the opportunity to strike the next blow in their escalating war to preserve “humankind” at any cost.

## Acces PDF Darwins Radio 1 Greg Bear

This doomsday masterpiece from the author of *Eon* and *Hull Zero Three* was a finalist for the Hugo and Nebula awards. On July 26, Arthur Gordon learns that Europa, the sixth moon of Jupiter, has disappeared. Not hiding, not turned black, but gone. On September 28th, Edward Shaw finds an error in the geological records of Death Valley. A cinder cone was left off the map. Could it be new? Or, stranger yet, could it be artificial? The answer may be lying beside it—a dying Guest who brings devastating news for Edward and for Planet Earth. As more unexplained phenomena spring up around the globe—a granite mountain appearing in Australia, sounds emanating from the earth's core, flashes of light among the asteroids—it becomes clear to some that the end is approaching, and there is nothing we can do. In *The Forge of God*, award-winning author Greg Bear describes the final days of the world on both a massive, scientific scale and in the everyday, emotional context of individual human lives. Facing the destruction of all they know, some people turn to God, others to their families, and a few turn to saviors promising escape from a planet being torn apart. Will they make it in time? And who gets left behind to experience the last moments of beauty and chaos on earth? Nominated for the Nebula, Hugo, and Locus Awards, *The Forge of God* is an engrossing read, breathtaking in its scope and in its detail.

Nebula Award Finalist: A genetic engineering breakthrough may portend the destruction of humanity in this cyberpunk novel by the author of *The Forge of God*. This Hugo and Nebula Award finalist follows present-day events in which the fears concerning the nuclear annihilation of the world subsided after the Cold War and the fear of chemical warfare spilled over into the empty void it left behind. An amazing breakthrough in genetic engineering made by Vergil Ulam is considered too dangerous for further research, but rather than destroy his work, he injects himself with his creation and walks out of his lab,

## Acces PDF Darwins Radio 1 Greg Bear

unaware of just how his actions will change the world. Author Greg Bear's treatment of the traditional tale of scientific hubris is both suspenseful and a compelling portrait of a new intelligence emerging amongst us, irrevocably changing our world.

The “provocative and entertaining follow-up” to *The Forge of God*: Exiled from their planet, humans unite with one alien race in the fight against another (Publishers Weekly). *The Ship of the Law* travels the infinite enormity of space, carrying eighty-two young people: fighters, strategists, scientists—and children. After one alien culture destroyed their home, another offered the opportunity for revenge in the form of a starship built from fragments of the Earth's corpse, a ship they now use to scour the universe in search of their enemy. Working with sophisticated nonhuman technologies that need new thinking to comprehend them, they're cut off forever from the people they left behind. Denied information, they live within a complex system that is both obedient and beyond their control. They're frightened. And they're waging war against entities whose technologies are unimaginably advanced and vast, and whose psychology is ultimately, unknowably alien. In *Anvil of Stars*, the multimillion-selling, Nebula Award-winning author of *Eon* and other science fiction masterpieces “fashions an action-packed and often thrilling plot; by using each of the well-depicted alien races to mirror human behavior, he defines what it means to be *Homo sapiens*. . . . A gripping story” (Publishers Weekly).

A harrowing thriller based on real-life discoveries in cell theory and the battle against aging and death by the bestselling author of *Darwin's Radio* and *War Dogs* Scientist Hal Cousins is on the brink of success in his quest to determine the biological underpinnings of immortality. Funded by angel investors, the brilliant researcher makes a trip by submersible to the bottom of the sea, searching for

## Acces PDF Darwins Radio 1 Greg Bear

primitive one-celled organisms that may be related to the earliest life forms on Earth. But the trip turns into a nightmare when Cousins's pilot goes berserk and turns on him. The homicidal attack is only the first in a series of events that sends the biochemist on the run, pursued by faceless enemies who want his studies terminated and Cousins dead. Cousins must face the realization that his research has brought him into contact with a vast conspiracy. Across the country, scientists are being murdered to cover up the fact that someone has discovered how to control minds through bacterial manipulation—and that the trigger bacteria now infects much of the world's population. Discredited and not knowing whom to trust, Cousins must gamble everything with Earth's very survival at stake. Award-winning author Greg Bear creates a tense, stunningly plausible thriller all too firmly rooted in scientific fact.

AN EPIC INTERSTELLAR TALE OF WAR FROM A MASTER OF SCIENCE FICTION. One more tour on the red. Maybe my last. They made their presence on Earth known thirteen years ago. Providing technology and scientific insights far beyond what mankind was capable of. They became indispensable advisors and promised even more gifts that we just couldn't pass up. We called them Gurus. It took them a while to drop the other shoe. You can see why, looking back. It was a very big shoe, completely slathered in crap. They had been hounded by mortal enemies from sun to sun, planet to planet, and were now stretched thin -- and they needed our help. And so our first bill came due. Skyrines like me were volunteered to pay the price. As always. These enemies were already inside our solar system and were moving to establish a beachhead, but not on Earth. On Mars.

Hugo Award Finalist: A near-future novel of artificial intelligence, human nature, and mass murder that “succeeds on virtually every level” (The New York Times Book Review). In Los Angeles in 2047,

## Acces PDF Darwins Radio 1 Greg Bear

advances in the science of psychology have made crime a rare occurrence. So it's utterly shocking when eight bodies are detected in an apartment, and not long afterward the perpetrator is revealed as well: noted poet Emmanuel Goldsmith. The LAPD's Mary Choy—who has had both her appearance and her police work enhanced by nanotechnology—is tasked with arresting the killer, while psychotherapy pioneer Martin Burke prepares to explore his mind. Meanwhile, Goldsmith's good friend and fellow writer reels at the news—while, far from all of them, a space probe makes a startling discovery. This “excellent” novel about technology, identity, and the nature of consciousness is a thought-provoking stunner by the Nebula Award-winning author of the Eon series and the Forerunner Saga (Chicago Tribune).

The Dome of the Rock in Jerusalem has been blown to bits by extremists, and, in retaliation, thousands have died in another major attack on the United States. Now the FBI has been dispatched to deal with a new menace. A plague targeted to ethnic groups--Jews or Muslims or both--has the potential to wipe out entire populations. But the FBI itself is under political assault. There's a good chance agents William Griffin, Fouad Al-Husam, and Jane Rowland will be part of the last class at Quantico. As the young agents hunt a brilliant homegrown terrorist, they join forces with veteran bio-terror expert Rebecca Rose. But the plot they uncover--and the man they chase--prove to be far more complex than anyone expects.

Music, myth, and magic mix in this tale of a melody not meant for human ears, from the New York Times–bestselling and award-winning author of Darwin's Radio. Michael Perrin is an aspiring poet, struggling to express the chaotic cadences of his thoughts on paper. He finds a kindred spirit in Arno Waltiri, the film score composer behind several of Michael's favorite classic movies. The maestro's

## Acces PDF Darwins Radio 1 Greg Bear

greatest piece, however, was performed in front of a live audience only once. The concerto Opus 45, Infinity left its listeners entranced, altered to the very core of their souls. Waltiri's composition is a song of power. Never meant to be heard by human ears, its melody is as captivating as a siren's call, its notes ring out like a death knell, and its rhythms shake the very foundations of reality. The music's otherworldly tones have led Michael through the gate between Earth and the Realm of the Sidhedark, where faeries reign by rule of magic—and where Michael must find his muse if he's ever to return home. The Infinity Concerto is a fantasy masterpiece by the Hugo and Nebula Award-winning author of the Forerunner Saga, Eon, and other imaginative classics.
