The LPN is about to give 100 mg Lopressor (metoprolol) to a client. Before administering the drug, he takes the patient's vitals, which are as follows: What action should the LPN take? Hold the drug and report the findings to the RN on duty. Give the client half the prescribed dose and report the findings to the RN on duty. Give the client double the dose and report the findings to the RN on duty.

~~Question 1 of the Pharmacological Therapies Practice Test ...~~

Dosage and Calculations Practice Tests are some of the most commonly-searched practice exams for both student nurses and nurses wanting to take licensure and certification exams.. This is because when such items are asked in examinations, an examinee is expected to calculate and compute drug dosages for their patients. It is expected that these computations are accurate.

Smart study strategies are outlined in the penultimate section of this guide - this will put you on a steady path to achieving success on your NCLEX exam! Download the NCLEX Trainer Today and Kickstart Your Journey to NCLEX Success!

Pharmacology is one of the most challenging subjects in nursing, not only because there is over a thousand drugs out there in the market to be familiar with, but also because pharmacology is a part of every aspect of patient care. In fact, it is a hefty part of medical-surgical nursing, pediatrics, maternal and child, geriatrics, hospice, psychiatric nursing and even community nursing. When flipping through the pages of a 3-inch thick drug handbook, would-be nurses feel a great sense of frustration. They ask themselves, "How do I study this?," "Which information should I focus on?." A proven strategy in becoming successful in Pharmacology is familiarizing oneself with the drugs. One way of doing this is to answer as many NCLEX-style questions on Pharmacology as you can

File Type PDF Lpn Pharmacology Practice Questions And Answer

and then study their rationales. This narrows down concepts to the most significant ones. Another strategy is to look at concepts that deal with safety issues. Many questions revolve around safety. It is the primary concern in Pharmacology. Have there been new drugs introduced in the last 3-5 years? Zero-in on that, too. Do research on certain issues that actually happened in real life that greatly affected patient outcomes. These strategies are going to work wonders in achieving your goals in becoming a registered nurse, but to dig into books just to look for concepts that deal with safety, and doing research on true-to-life accounts are too time consuming. This is the main reason why you need this 100-question book. The reliability of this book is ensured because nursing instructors who are experts in the field of Pharmacology developed the questions themselves. Its purpose is to serve as a very useful tool in familiarizing aspiring nurses with the concepts. More importantly, it gives a fair head start in the NCLEX review because the instructors have done the digging and the research part for you! Here in this book, you will have a compilation of questions that revolve around safety and positive patient outcomes. It will also feature new approved drugs and the concerns in their use. It will also include current topics on Pharmacology, with up-to-date information that will most likely come out in the NCLEX examination. It will give you the right concepts, and it will save you time especially during the hectic days of NCLEX preparation. So get your head start now!

Accompanying CD-ROM contains a 265-question examination with rationales and test-taking tips for

File Type PDF Lpn Pharmacology Practice Questions And Answer

additional review.

This core text offers LPN/LVN students a clear, concise introduction to pharmacology, focusing on basic principles and the nurse's responsibility in drug administration. Organized by body system, the book examines pharmacologic properties and therapeutic applications of drug classes. Summary Drug Tables present generic and trade drug names, uses, adverse reactions, and usual dosage ranges. This edition has thoroughly updated drug information, a new "Pharmacology in Practice" case study feature, Nursing Alerts, Lifespan Alerts, Chronic Care Alerts, Diversity Alerts, and additional material on the nursing process. Including a FREE copy of Lippincott's Photo Atlas of Medication Administration, a bound CD-ROM, a companion website includes an NCLEX® alternate item format tutorial, a Spanish-English audio glossary, monographs on 100 most commonly prescribed drugs, Listen and Learn, Concepts in Action animations, Watch and Learn video clips, and Dosage Calculation Quizzes. The full text is also available online. Online Tutoring powered by Smarthinking—Free online tutoring, powered by Smarthinking, gives students access to expert nursing and allied health science educators whose mission, like yours, is to achieve success. Students can access live tutoring support, critiques of written work, and other valuable tools.

answers/explanations, to help you remember the essentials End-of-book multiple-choice Q&A; Quick Guides to Medication Safety, Ophthalmic and Dermatologic Drugs, and Abbreviations to Avoid; Glossary of essential pharmacology terms.

Pharmacology for Nurses, Second Edition teaches undergraduate nursing students the basic concepts of pharmacology.

Effectively learning pharmacology requires students to clearly see the connection between pharmacology, disease and patient care. Pharmacology for Nurses, 3e i(this is the standalone book) is structured to present pharmacology and pathology together, so students can more easily grasp the interrelationship between these subjects and provide a holistic perspective to patient care. A prototype approach, easy to follow presentation and extensive pedagogical aids enable students to understand key concepts and apply essential components of nursing care to drug therapy.
