How to Have Great Ideas is the essential guide for students and young professionals looking to embrace creative thinking in design, advertising and communications. It provides 53 practical strategies for unlocking innovative ideas. Strategies include improvisation techniques, changing the scenery, finding hidden links, looking to nature for inspiration, combining unusual systems, challenging set boundaries and many more. Each strategy is packed with great examples of successful contemporary and historical designs – from a designer dress made out of an old typewriter to ticket machines powered by recycled bottles in China, via the reimagining of famous brand logos and mis-use of photocopiers. Packed with practical projects to kick-start inventive thought in idea-blocked moments, this book explores creative thinking across all visual arts disciplines.

Because of media information and the popularity of the Internet, many first time users and seniors are becoming more interested in computers. The demand for senior computer instruction is basically the result of people retiring before computer use in the workplace became common or retiring from jobs where computer use was not emphasized. A different approach is presented in this book revealing hidden programs and utilities that every first time user would want to know, and unlocking hidden codes that first time users can use to maintain and fix any and all problems that may come up with their computers using the MMC, CMD, Explorer Shell and other built-in utilities.

This latest edition is designed to help students master the math essentials found on all levels of the COMPASS, ASSET, and ACCUPLACER exams. These exams, given by colleges country-wide, are taken by students to place them into the appropriate college courses. This guide offers comprehensive review and practice for the high school math students need to know to succeed on their exams, including Pre-Algebra, Algebra, Geometry, and Trigonometry fundamentals.

In this clever book, bestselling author Richard Templar delivers a collection of principles, tactics and techniques that will make sure things always get done, without you ever having to break a sweat or stay up into the small hours to do it. These pithy, self-contained ideas are so straightforward that you can even read the book itself without trying too hard

One of the most respected basketball coaches in the country relates the story of his life, from his turbulent childhood to the North Carolina Tar Heels' national championship in 2009, and discusses the coaching philosophy that has made him successful.

This first textbook on both micro- and nanooptics introduces readers to the technological development, physical background and key areas. The opening

chapters on the physics of light are complemented by chapters on refractive and diffractive optical elements. The internationally renowned authors present different methods of lithographic and nonlithographic fabrication of microoptics and introduce the characterization and testing of microoptics. The second part of the book is dedicated to optical microsystems and MEMS, optical waveguide structures and optical nanostructures, including photonic crystals and metamaterials. Each chapter includes exercises illustrating a sample approach to new and complex topics, making the textbook suitable for lectures on optics as part of a physics or electrical engineering course.

From the New York Times bestselling author of *Shoe Addicts Anonymous* and *Always Something There to Remind Me* comes a delicious new novel about the search for true love and all the ingredients that go into it. As far as Gemma is concerned, her days of dating are over. In fact, it's her job to cater other peoples' dates, and that's just fine by her. At thirty-seven, she has her own business, working as a private chef, and her life feels full and secure. She's got six steady clients that keep her hands full. There's Lex, the fussy but fabulous department store owner who loves Oysters Rockefeller and 1950s comfort food; Willa, who needs to lose weight under doctor's orders but still believes butter makes everything better; a colorful family who may or may not be part of the Russian mob; an überwealthy Georgetown family; the picture-perfect Van Houghtens, whose matriarch is "allergic to everything"; and finally, a man she calls "Mr. Tuesday," whom she has never met but who she is strangely drawn to. For Gemma, cooking is predictable. Recipes are certain. Use good ingredients, follow the directions, and you are assured success. Life, on the other hand, is full of variables. So when Gemma's takes an unexpected turn on a road she always thought was straight and narrow, she must face her past and move on in ways she never would have imagined. Because sometimes in life, all you need is a little hope, a lot of courage, and---oh yes---butter.

Water is essential to life for humans and their food crops, and for ecosystems. Effective water management requires tracking the inflow, outflow, quantity and quality of ground-water and surface water, much like balancing a bank account. Currently, networks of ground-based instruments measure these in individual locations, while airborne and satellite sensors measure them over larger areas. Recent technological innovations offer unprecedented possibilities to integrate space, air, and land observations to advance water science and guide management decisions. This book concludes that in order to realize the potential of integrated data, agencies, universities, and the private sector must work together to develop new kinds of sensors, test them in field studies, and help users to apply this information to real problems.

How To Live Your Life Without Insecurities Greetings! If you're reading this, I'm assuming that you're either a) interested in the self-help genre or b) interested in helping yourself. Either way, I hope you get some value from the words that follow. My aim for this book wasn't to go all technical, nor act as a 'proxy-therapist'. It's written to be informational, yet relatable and easy to read. Dividing the book into '28 days, 28 ways' was done for several reasons:-it gave me a clear structure within which to write, giving clarity to my thoughts and ideas (and hopefully yours too!)-it's the sort of book you can 'dip into'. You can read it from start to finish, or you can pick and choose bits and pieces. Or, even better, you can start in the middle, finish at the start or begin at the end. Here Is A Preview Of What You Will Learn... Self-Esteem - What Is It ? Self-Confidence - What Is It ? Self-Development - What Is It ? 28 Ways, 28 Days Practice Gratitude Freely Give & Receive Affection Heal From Your Past Much, Much More ! Get Your Copy Today!

Papers from a recent conference highlight the need for emission reduction strategies and technologies in transport and off-highway mobile machinery. They address issues faced by vehicle machine and engine manufacturers regarding future emission legislation, and discuss technical strategy together with the

likely direction that research will take in response to these legislative demands. Focus is on reciprocating engines and their application challenges, with additional coverage of measurement techniques, installation dilemmas, and legislation trends. Specific subjects include hybrid power train systems, an injection natural gas engine for light-duty applications, and evaporative emission systems. Of interest to those working in industries involving combustion systems, fuel and air systems, engine design, and vehicle and machine systems. Lacks a subject index. c. Book News Inc.
