Company: Merial Rabies Vaccine.

Killed Virus. Rabies 3 Year.

DESCRIPTION: IMRAB® 3 contains the same virus strain that is used in the Pasteur Merieux Connaught human vaccine. The virus is grown in a stable cell line, inactivated, and mixed with a safe and potent adjuvant.

~~IMRAB 3 for Animal Use - Drugs.com~~

IMRAB® from Merial is the world's leading rabies vaccine. IMRAB offers many unique advantages to veterinarians — and the animals in their care: IMRAB has been widely used for more than 20 years — with millions of animals protected against rabies. Highly purified, inactivated virus used in vaccine production.

Most veterinarians have now
changed to the non-adjuvanted form
of the rabies vaccine for cats.
Originally, this vaccine was only
released as a one-year vaccine. That
meant that starting at the age of 12
weeks, a cat would need to receive
the vaccine annually to ensure
protection from the disease.

The seventh edition of the Canadian Immunization Guide was developed by the National Advisory Committee on Immunization (NACI), with the support of the Immunization and Respiratory Infections Division, Public Health Agency of Canada, to provide updated information and recommendations on the use of vaccines in Canada. The Public Health Agency of Canada conducted a survey in 2004, which confirmed that the Canadian Immunization Guide is a very useful and reliable resource of information on immunization.

Where To Download Rabies Vaccine Merial

The Food and Agriculture Organization of the United Nations has recently estimated that the world equid population exceeds 110 million. Working equids (horses, ponies, donkeys, and mules) remain essential to ensure the livelihood of poor communities around the world. In many developed countries, the equine industry has significant economical weight, with around 7 million horses in Europe alone. The close relationship between humans and equids and the fact that the athlete horse is the terrestrial mammal that travels the most worldwide after humans are important elements to consider in the transmission of pathogens and diseases, amongst equids and to other species. The potential effect of

Where To Download Rabies Vaccine Merial

climate change on vector ecology and vector-borne diseases is also of concern for both human and animal health. In this Special Issue, we intend to explore our understanding of a panel of equine viruses, looking at their pathogenicity, their importance in terms of welfare and potential association with diseases, their economic importance and impact on performance, and how their identification can be helped by new technologies and methods.

This book is a printed edition of the Special Issue "Rabies Symptoms, Diagnosis, Prophylaxis and Treatment" that was published in TropicalMed

"Although there is debate about the estimated health burden of rabies,

Where To Download Rabies Vaccine Merial

the estimates of direct mortality and the DALYs due to rabies are among the highest of the neglected tropical diseases. Poor surveillance, underreporting in many developing countries, frequent misdiagnosis of rabies, and an absence of coordination among all the sectors involved are likely to lead to underestimation of the scale of the disease. It is clear, however, that rabies disproportionately affects poor rural communities, and particularly children. Most of the expenditure for post-exposure prophylaxis is borne by those who can least afford it. As a result of growing dog and human populations, the burden of human deaths from rabies and the economic costs will continue to escalate in the absence of concerted efforts and investment for control. Since the first

Where To Download Rabies Vaccine Merial

WHO Expert Consultation on Rabies in 2004, WHO and its network of collaborating centres on rabies, specialized national institutions, members of the WHO Expert Advisory Panel on Rabies and partners such as the Gates Foundation, the Global Alliance for Rabies Control and the Partnership for Rabies Prevention, have been advocating the feasibility of rabies elimination regionally and globally and promoting research into sustainable cost-effective strategies. Those joint efforts have begun to break the cycle of rabies neglect, and rabies is becoming recognized as a priority for investment. This Consultation concluded that human dog-transmitted rabies is readily amenable to control, regional elimination in the medium term and even global elimination in the long
