Man, was a a distant shore, and the men spread upon it in wave... Each wave different, and each wave stronger. The Martian Chronicles Ray Bradbury is a storyteller without peer, a poet of the possible, and, indisputably, one of America's most beloved authors. In a much celebrated literary career that has spanned six decades, he has produced an astonishing body of work: unforgettable novels, including Fahrenheit 451 and Something Wicked This Way Comes; essays, theatrical works, screenplays and teleplays; The Illustrated Mein, Dandelion Wine, The October Country, and numerous other superb short story collections. But of all the dazzling stars in the vast Bradbury universe, none shines more luminous than these masterful chronicles of Earth's settlement of the fourth world from the sun. Bradbury's Mars is a place of hope, dreams and metaphor-of crystal pillars and fossil seas-where a fine dust settles on the great, empty cities of a silently destroyed civilization. It is here the invaders have come to despoil and commercialize, to grow and to learn -first a trickle, then a torrent, rushing from a world with no future toward a promise of tomorrow. The Earthman conquers Mars ... and then is conquered by it, lulled by dangerous lies of comfort and familiarity, and enchanted by the lingering glamour of an ancient, mysterious native race. Ray Bradbury's The Martian Chronicles is a classic work of twentieth-century literature whose extraordinary power and imagination remain undimmed by time's passage. In connected, chronological stories, a true grandmaster once again enthralls, delights and challenges us with his vision and his heart-starkly and stunningly exposing in brilliant spacelight our strength, our weakness, our folly, and our poignant humanity on a strange and breathtaking world where humanity does not belong.

The Earthmen came by the handful, then the hundreds, then the millions. They swept aside the majestic, dying Martian civilization to build their homes, shopping malls, and cities. Mars began as a place of boundless hopes and dreams, a planet to replace an Earth sinking into waste and war. It became a canvas for mankind's follies and darkest desires. Ultimately, the Earthmen who came to conquer the red-gold planet awoke to discover themselves conquered by Mars. Lulled by its ancient enchantments, the Earthmen learned, at terrible cost, to overcome their own humanity. Rendered in gorgeous, full-color art by Dennis Calero, Ray Bradbury's The Martian Chronicles: The Authorized Adaptation graphically translates fourteen of Bradbury's famous interconnected science-fiction stories, turning an unforgettable

Seminar paper from the year 2004 in the subject American Studies - Literature, grade: A, San Diego State University, course: Science Fiction - Alternate Worlds, Near Futures, 1 entries in the bibliography, language: English, abstract: Centuries ago, the colonization of the New World represented one of the major aims of European nations and has been praised or criticized ever since. In The Martian Chronicles, Ray Bradbury repeats the past by depicting the conquest and colonization of another planet rather than another continent. Settling on Mars is the only escape left for the population on Earth, which has become a decaying planet facing major environmental, social and political problems. As people have destroyed their former basis for living, they try to find a new one on the foreign planet Mars. History repeats itself during the colonization of Mars, as native populations are decimated and strangeness is familiarized by cultivating the foreign land in order to suit the colonizers' desires. In his novel, Bradbury questions and criticizes the concept of colonization, thereby drawing on Mars as a symbol of America after its discovery by Columbus, and its inescapable "cultivation" through the Pilgrims. However cruel the history of colonization might be, it is also regarded inevitable for the rest of the world as increasing populations long for more territories and resources. The criticism in the novel primarily centers on how this expansion takes place, namely in a destructive and exploitative way. Bradbury reveals the tensions between inhabitants of Earth and those of Mars, thus questioning the Earthmen's reckless behavior towards native Martians which serve as a symbol for Native Americans. Moreover, the author criticizes mankind's irresponsible exploitation of the resources they have been given on Earth, and their ability to destroy nature without even realizing or considering the terrible outcome. The issues to be discussed in the following are those of imperialism, environmental destruction and racism, all being rooted in the mythology of the American westward expansion and the Frontier spirit. By large, Bradbury's novel also reflects the anxieties of the early 1950s, namely the fear of a nuclear war and the emergence of the Civil Rights movement. A significant basis for the interpretation of The Martian Chronicles is the approach to the story as an allegory for man's immoral blindness in the light of the "manifest destiny" and the frontier spirit.
