Challenging Cases in Rheumatology and Diseases of the Immune System is the latest title in a growing collection of thought-provoking case-based titles from Massoud Mahmoudi, D.O., Ph.D. Like his three preceding titles, Challenging Cases in Allergy and Immunology (2009), Challenging Cases in Allergic and Immunologic Diseases of the Skin (2010), and Challenging Cases in Pulmonology (2011), this easy-to-read title presents the topic in a challenging and enjoyable case-based format. Developed by 30 distinguished contributors, the book consists of six parts and 16 chapters, with each chapter presenting two cases. The style of this title follows the previous books: each topic begins with an abstract, followed by a case presentation, working diagnosis, data, final diagnosis, and discussion. In addition, to enhance a review of the subject and stimulate critical thinking, there are 5 to 10 multiple choice questions and answers in each chapter. Challenging Cases in Rheumatology and Diseases of the Immune System is an indispensable resource for all clinicians who care for patients with rheumatic and immunologic disorders.

Modern Biotechnology has potential for solving many problems associated with animal productivity and health and offers exciting opportunities for enhancing agricultural productivity. At present the focus is, however, on the issues and problems of significance for livestock producers in the developed world. In order to fully realize the benefits of this technology in developing countries, there is a need to identify, characterize and apply appropriate gene-based technologies for these regions. These proceedings present peer reviewed state-of-the-art papers describing the achievements in the areas of animal breeding and genetics, animal nutrition, animal health, and environment, ethics, safety, and regulatory aspects of gene-based technologies; achievements which could be realized using these modern scientific tools to maximise the benefits from the 'livestock revolution' that is taking place; and the constraints in the use of gene-based technologies and their specific research needs. This book will help in bridging the wide gap between developed and developing countries, in the development and use of gene-based technologies, and to elucidate the current and future roles of such technologies in the developing world. It is a good reference source for researchers, students and policy-makers alike.
