writer Jill Lepore offers a magisterial account of the origins and rise of a divided nation, an urgently needed reckoning with the beauty and tragedy of American history. Written in elegiac prose, Lepore's

groundbreaking investigation places truth itself—a devotion to facts, proof, and evidence—at the center of the nation's history. The American experiment rests on three ideas—"these truths," Jefferson called

them—political equality,
natural rights, and the
sovereignty of the people.
And it rests, too, on a
fearless dedication to
inquiry, Lepore argues,
because self-government
depends on it. But has the

nation, and democracy
itself, delivered on that
promise? These Truths tells
this uniquely American
story, beginning in 1492,
asking whether the course of
events over more than five
centuries has proven the

nation's truths, or belied them. To answer that question, Lepore traces the intertwined histories of American politics, law, journalism, and technology, from the colonial town meeting to the nineteenth-

century party machine, from talk radio to twenty-first-century Internet polls, from Magna Carta to the Patriot Act, from the printing press to Facebook News. Along the way, Lepore's sovereign chronicle is filled with

arresting sketches of both well-known and lesser-known Americans, from a parade of presidents and a rogues' gallery of political mischief makers to the intrepid leaders of protest movements, including

Phyllis Schlafly, the uncredited architect of modern conservatism.

Americans are descended from slaves and slave owners, from conquerors and the conquered, from immigrants and from people who have

fought to end immigration.

"A nation born in contradiction will fight forever over the meaning of its history," Lepore writes, but engaging in that struggle by studying the past is part of the work of

citizenship. "The past is an inheritance, a gift and a burden," These Truths observes. "It can't be shirked. There's nothing for it but to get to know it."
