Kenneth Louden's Compiler Construction Text

by Kenneth C. Louden. Preface. This book is an introduction to the field of compiler construction. It combines a detailed study of the theory underlying the modern approach to compiler design, together with many practical examples, and a complete description, with source code, of a compiler for a small language.

Preface - Compiler Construction by K. Louden

Compiler Construction: Principles and Practice Chapter 1
Exercise Answers, Page 3 The table shows that all three compilers perform constant folding, and that the Gnu C compiler performs constant propagation except where control flow is present. The Sun C compiler is the only one that performs propagation in all cases.

...

Compiler Construction, a modern text written by two leaders in the field, demonstrates how a compiler is built. Describing the necessary tools and how to create and use them, the authors combine the task into modules, placing equal emphasis on the action and data aspects of compilation. Attribute grammars are used extensively ...

COMPILER CONSTRUCTION

Compiler construction is a relatively hard topic with a lot of theory needed to be understood before you can write even the most trivial compiler. Regular expressions, finite automata, BNF or attribute grammars are just a few things you need to know and
