All the books here are absolutely free, which is good news for those of us who have had to pony up ridiculously high fees for substandard audiobooks. Librivox has many volunteers that work to release quality recordings of classic books, all free for anyone to download. If you've been looking for a great place to find free audio books, Librivox is a good place to start.

Epa Drinking Water Guidelines

EPA sets legal limits on over 90 contaminants in drinking water. The legal limit for a contaminant reflects the level that protects human health and that water systems can achieve using the best available technology.

EPA rules also set water-testing schedules and methods that water systems must follow.

Drinking Water Regulations | US EPA

3 EPA's surface water treatment rules require systems using surface water or ground water under the direct influence of surface water to Disinfect their water, and Filter their water, or Meet criteria for avoiding filtration so that the following contaminants are controlled at the following levels:

National Primary Drinking Water Regulations | US EPA

While secondary standards are not federally enforceable, EPA requires a special notice for exceedance of the fluoride secondary standard of 2.0 mg/L. Community water systems that exceed the fluoride secondary standard of 2 mg/L, but do not exceed the primary standard of 4.0 mg/L for fluoride, must provide public notice to persons served no later than 12 months from the day the water system learns of the exceedance (40 CFR 141.208).
