Austin Motor Company's small straight-4 automobile engine, the A series, is one of the most common in the world [citation needed]. Launched in 1951 with the Austin A30, production lasted until 2000 in the Mini. It used a cast-iron block and cylinder head, and a steel crankshaft with 3 main bearings. The camshaft ran in the cylinder block, driven by a single-row chain for most applications, and ...

BMC A-series engine - Wikipedia

Engine ID for Standard Mini Engines
There were many versions of the A and A+ series of engines used in Minis over the 42 years they were produced. If the engine ID tag is still in place then a quick check of the beginning of the engine number will tell you what the engine size is.
