Reduction Gears. Our reduction gear range is of the proven single-input single-output design with built-in clutch and thrust block. They have a variety of power take-offs that enable large shaft generators to be driven, and electric motors to feed in power for get-you-home propulsion or as part of a hybrid system. Power, torque and shaft offsets correspond to current and anticipated market demands in terms of engine power/ speed and propeller revolutions for a wide range of vessels.

## **Reduction Gears - Kongsberg Maritime**

The main reduction in gearbox 25 is two stage for minimum weight, with helical gearing (or high contact ratio gears) in both stages to minimize vibration and enhance reliability. There is no-torque splitting at the first stage. Referring now to FIGS. 3-5, FIG. 3 shows a face gear reduction as the first stage, and a double helical epicyclic output.
