GitHub - jweigend/concepts-of-programming-languages ...

Programming languages provide the abstractions, organizing principles, and control structures that programmers use to write good programs. This book is about the concepts that appear in programming languages, issues that arise in their implementation, and the way that language design affects program development. The text is divided into four parts:

Languages

This book describes the fundamental concepts of programming languages by discussing the design issues of the various language constructs, examining the design choices for these constructs in some of the most common languages, and critically comparing design alternatives. Any serious study of programming languages requires an examination of

Concepts Of Programming Languages 12th Edition Textbook ...

Excellent question! In Java, the programming language wants to know what kind of information you are going to be storing in a variable.. This is because Java is a strongly typed language.. I could teach you about what the difference is between a strongly typed language and a weakly typed language, but that will likely bore you right now, so let's just focus on what a type is in Java and why ...
