Using a performance turbocharger is a great way to get more power from diesel engines. The turbo works by pushing more air into the engine and pressurizing the air intake. Using a turbo can allow it to generate higher power while improving engine efficiency. A typical stock turbo increases air flow three to four times over a non-turbo engine.

5 Ways to Get More Power From Your Diesel Engine - Diesel ...

Using a tuner it is possible to increase gasoline or diesel engine performance up to 99 horsepower and 88 lb-ft of torque on a gas truck, and 120 horsepower and 240 lb-ft of torque on a diesel truck depending upon the model. Tuners extract this power by adjusting the operating conditions of the engine toward increased performance.
